

LUMAR IDEAL II inc.

Vapor generator

TECHNICAL FEATURES

VAP-PRO 2800

Stainless Steel Boiler	yes
Continuous Steam 24/24 hours	yes
Operating Pressure	5.5 bar
Maximum Steam Temperature	145°C
Power Supply	110V~
Boiler Output	2100W
Steam Regulator	yes
Outside Body	stainless steel
Injection Pump	no
Size and Weight	50x32 7kg
Vacuum Motor	no
Waste Water Tank	no

Our Mission:

The concept of ecological vapor cleaning is relatively new to North America, but has been well established in Europe since the late 1970's.

VAP-PRO vapor generators combine high pressure and high temperature, to effectively remove dirt and grease from all surfaces. VAP-PRO vapor generators are indispensable in all industries where true deep cleaning and sanitizing are crucial.
