

Vapor generator

TECHNICAL FEATURES	VAP-PRO 3000 VAC
Stainless Steel Boiler	Yes
Continuous Steam 24/24 hours	Yes
Operating Pressure max	6.5 bar
Maximum Steam Temperature	160°C
Power Supply	110V~
Maximum Boiler Output	1200w/900w
Total amp	15 amp
Steam Regulator	Yes
Outside Body	Stainless steel
Injection Pump	Yes
Size and Weight	60x55x33 24kg
Vacuum Motor	1000W
Waste Water Tank	10 lt

Option:
 Tension chaudière 200 v~ 3 phase
 6 KWh / 10 amp
 Operating Pressure : 7 bar 105 psi

Our Mission:

The concept of ecological vapor cleaning is relatively new to North America, but has been well established in Europe since the late 1970's.

VAP-PRO vapor generators combine high pressure and high temperature, to effectively remove dirt and grease from all surfaces. VAP-PRO vapor generators are indispensable in all industries where true deep cleaning and sanitizing are crucial.

IDEAL

VAP-PRO 3000 VAC
